

FISHER & PAYKEL

GAS-ON-GLASS COOKTOP

**CG301D, CG302D, CG451D, CG603D, CG604D, CG752D, CG903D
& CG905D models**

INSTALLATION GUIDE

GB IE IN PH

590657D 08.17

⚠ WARNING!

Electrical shock hazard
Disconnect the appliance from the mains electricity supply before carrying out any work or maintenance on it.
Connection to a good earth wiring system is essential and mandatory. Alterations to the domestic wiring system must only be made by a qualified electrician.
Failure to follow this advice may result in electrical shock or death.

⚠ WARNING!

Cut Hazard
Take care - panel edges are sharp.
Failure to use caution could result in injury or cuts.

IMPORTANT SAFETY INSTRUCTIONS

- Particular attention shall be given to the relevant requirements regarding ventilation.
- Read these instructions carefully before installing this product.
- Please make this information available to the person installing the appliance as it could reduce your installation costs.
- This appliance must be installed and serviced only by a suitably qualified and registered person, and in accordance with the current editions of the following standards and regulations or other locally applicable regulations:
 - Gas Safety (Installation and Use Regulations
 - Building Regulations
 - British Standards
 - Regulations for Electrical Installation
- Incorrect installation, for which the manufacturer accepts no responsibility, may cause personal injury or damage and could invalidate any warranty or liability claims.

IMPORTANT!
SAVE THESE INSTRUCTIONS

The models shown in this installation guide may not be available in all markets and are subject to change at any time. For current details about model and specification availability in your country, please go to our website www.fisherpaykel.com or contact your local Fisher & Paykel dealer.

IMPORTANT SAFETY INSTRUCTIONS

- **This gas appliance is suitable for connection only to the gas type for which it was set at the factory, as declared on the appliance data label. It is not convertible for use on any other gas type. If in doubt, refer to the local gas network operator or gas supplier to confirm gas type at installation site.**
- **Do not modify this appliance.**
- **Do not use or store flammable materials on or near this appliance.**
- **Do not spray aerosols in the vicinity of this appliance while it is in operation.**
- **Packing elements (eg plastic bags, polystyrene foam, staples, packing straps etc) and tools should not be left around during and after installation, especially if they are within easy reach of children, as these may cause serious injuries.**
- **You must remove the transit screws before installing the cooktop. See step 8 of installation instructions.**

Ventilation requirements

- The appliance should be installed in a room or space with an air supply in accordance with BS 5440:2 2009.
- For rooms with a volume of less than 5 m³, permanent ventilation through a free area of at least 100 cm² will be required.

- For rooms with a volume between 5 m³ and 10m³, permanent ventilation through a free area of at least 50 cm² will be required, unless the room has a door which opens directly to the outside air, in which case no permanent ventilation is required.
- For rooms with a volume greater than 10 m³, no permanent ventilation is required.

IMPORTANT!

Regardless of room size, all rooms containing the appliance must have direct access to the outside air via an openable window or equivalent.

- **Where there are other fuel-burning appliances in the same room, BS 5440-2: 2009 should be consulted to determine the correct amount of free area ventilation requirements.**
- **The above requirements also allow for use of a gas oven and grill, but you need to consult a qualified engineer if there are other gas-burning appliances in the same room.**

Before you install the appliance, please make sure that

- the local distribution conditions (nature of gas and pressure) and the adjustment of the appliance are compatible. For adjustment conditions for this appliance see 'Gas rate summary'.
- a suitable disconnection switch is incorporated in the permanent wiring, mounted and positioned to comply with the local wiring rules and regulations. A means of disconnection with at least a 3 mm air gap contact separation in all poles must be incorporated into the fixed wiring in accordance with the wiring rules, unless the local wiring rules allow for alternative means.
- the appliance is connected to a 220V - 240V 50HZ - 60HZ (10 A) power supply only and earthed via the power supply cable.
- there is a power outlet within reach of the power supply cable (900 mm from the centre rear of the product). This must be accessible after installation. The power supply cable should not touch any metal parts.
- if the power supply cable is damaged, it is replaced only by the special cable. obtainable from authorised Fisher & Paykel Service Agents: Part no. 534994 KIT SPARES TRMNL BLK-FLEX 11 (GB/IE/IN), or Part no. 534987 KIT SPARES TRMNL BLK-FLEX 4 (PH).
- the supply connection point (gas shut-off valve) is accessible after installation.
- the benchtop is made of a heat resistant material.
- the installation complies with all the requirements of all current local codes and regulations.

When you install the appliance

- We do not recommend you flush mount or seal this appliance into the bench with silicone or glue. Doing so will make future servicing difficult. Fisher & Paykel will not be liable for any costs associated with removing or replacing a sealed-in appliance, nor for repairing any damage that may be incurred by doing this.
- If installed with an approved flexible hose, the hose should not come in contact with the bottom of the appliance or any sharp edges. Flexible hose assemblies should be BS 699.1 certified.
- Seal exposed bare edges of the cutout with an oil-based paint or moisture-proof polyurethane to prevent possible moisture creeping between the cooktop trim and the benchtop.
- Take extreme care not to chip, crack, or break the top glass surfaces during installation. A heavy metal tool or part accidentally dropped on the glass could damage it.
- If, after following the instructions given, correct performance cannot be achieved, please contact your nearest Fisher & Paykel Authorised Service Centre, Customer Care, or contact us through our website listed at the end of this document.

2 PARTS SUPPLIED

Dual Wok Pan support
(Models with a Dual Wok only)

Pan support
(not supplied with
Dual Wok only models)

Mini wok Pan
support (1)
(CG604D only)

Small pan support (1)
(some models only)

Wok stand (1)

Fibre washer (1)

Elbow 1/2" BSP
external thread (1)

Clamping
brackets (4)
and screws (4)

LPG test point
adaptor (1)
(LPG models only)

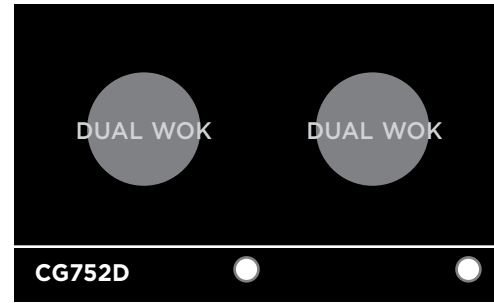

Installing multiple products

Note: We recommend installing multiple products in separate cutouts, with a minimum 5mm space between the glass edges of the adjacent products. If installing multiple products adjacent to each other within the same cutout, a separate joining strip kit is required for installation.

The kit is available from the nearest Fisher & Paykel Authorised Service Centre or our website listed at the end of this document.

If installing different products adjacent to each other (eg a wok burner next to an induction cooktop), the minimum clearance measurements for the different products may vary. Always use the greater distance.

3 GAS RATE SUMMARY-MODELS

③ GAS RATE SUMMARY

All appliances are factory set for either Natural Gas or LPG and are not convertible.
Check the 'Gas type' sticker on the base of the appliance.

GAS TYPE	CG301D		
	DUAL WOK		
	Jet size (mm)	Nominal rating (kW)	Nominal rating (kCal/h)
NG (20 mbar)*	1.25 1.25 0.71	6.00	5162
LPG (29 mbar)*	0.80 0.80 0.50	5.50 (395 g/h)	4732

*Nominal pressure with at least one large burner on High.

GAS TYPE	CG302D CG451D CG603D CG604D CG752D CG903D CG905D

(F) Depth of chassis	486	486	486	486	486	410	410	486
(G) Overall width of cutout	260	260	415	560	560	715	865	865
(H) Overall depth of cutout	490	490	490	490	490	410	410	490
(I) Corner radius of cutout	max. 10	max. 10	max. 10	max. 10	max. 10	max. 10	max. 10	max. 10
(J) Distance from top of bench to centre of gas inlet on product	30	30	30	30	30	30	30	30
(K) Distance from edge of chassis to gas inlet on product	21	21	21	21	21	21	21	21

5 CLEARANCE DIMENSIONS

CLEARANCE DIMENSIONS	CG301D	CG302D	CG451D	CG603D	CG604D	CG752D	CG903D	CG905D
	mm	mm	mm	mm	mm	mm	mm	mm
(A) Minimum clearance from left edge of cutout to nearest combustable surface	120	120	60	115	130	115	115	130
(B) Minimum clearance from right edge of cutout to nearest combustable surface	120	120	60	115	115	115	115	115
(C) Minimum clearance from rear edge of cutout to: Nearest combustable surface Nearest non-combustable surface	85 45	160 45	85 45	160 45	160 45	125 45	125 45	160 45
(D) Minimum height of non-combustible material when used on adjacent walls	150	150	150	150	150	150	150	150
(E) Minimum clearance from cooktop surface to: Rangehood Any other overhead exhaust fan Downward facing combustable surface Downwards-facing tiled or fire resistant surface	650 800 650 500	650 800 650 500	650 800 650 500	650 800 650 500	650 800 650 500	650 800 650 500	650 800 650 500	650 800 650 500
(F) Minimum clearance below top of benchtop to: Combustable surface Fisher & paykel oven or nearest non-combustible surface	70 65	70 65	70 65	70 65	70 65	70 65	70 65	70 65
(G) Minimum distance from right edge of cooktop to gas connection point on wall (if using a flexible hose)	250	250	250	250	250	250	250	250
(H) Distance from floor to gas connection point on wall (if using a flexible hose)	min. 800 - max. 850	min. 800 - max. 850	min. 800 - max. 850	min. 800 - max. 850	min. 800 - max. 850	min. 800 - max. 850	min. 800 - max. 850	min. 800 - max. 850
(I) Maximum overall depth of overhead cabinetry	600	600	600	600	600	600	600	600
(J) Minimum clearance from cooktop surface to overhead cabinetry	366	366	366	366	366	366	366	366

Note: Ensure there is an earthed power outlet within 900 mm of the centre rear of the product. The gas connector on the wall should be 800-850 mm (H) above the floor and to a distance of at least 250 mm (G) outside the width of the product, on the right-hand side. It should be accessible with the product installed.

⑥ FLUSH MOUNTING INSTALLATION (OPTIONAL)

⚠ WARNING!

We do not recommend flush mounting and sealing as servicing requires the cooktop to be removed from the benchtop. The owner carries all risk for flush mounting the cooktop. The owner must ensure the cooktop has been cut out from the benchtop before servicing can be carried out. Fisher & Paykel will not be liable for any costs associated with removing or replacing a flush-mounted and/or sealed-in product, nor for repairing any damage that may be incurred by doing this.

Note: Gas inlet connection is located in the rear right corner.

⑥ FLUSH MOUNTING INSTALLATION (OPTIONAL)

① ROUTER THE BENCHTOP TO THE SPECIFIED DEPTH

② FIT THE CLAMPING BRACKETS

③ MASK OFF THE AREA TO BE SILICONED

④ APPLY SILICONE

Ensure silicone does not leak underneath the glass.

⑤ WIPE OFF EXCESS SILICONE

⑥ IF REMOVING PRODUCT, CUT AROUND THE SILICONE

7 DISCARD PACKAGING

Model may vary from illustrations shown

8 REMOVE THE TWO TRANSIT SCREWS

9 FIT THE ELBOW AND WASHER

10 LOWER GENTLY INTO THE CUTOUT

11 FIT CLAMPING BRACKETS BASED ON THE BENCHTOP THICKNESS

12 SECURE TO BENCHTOP

Repeat on all the other sides

13 CONNECT TO GAS SUPPLY

NG Models

Adjust to obtain a **test point pressure of 20 mbar** with all burners operating at highest setting.

LPG Models

- Make sure to fit the supplied test point adaptor.
- Make sure the **supply pressure is regulated to 29 mbar**, with all burners operating at highest setting.

ALL Models

- Make sure the connection point will be accessible with the cooktop installed.
- To enable the gas supply to be readily shut off by the customer, make sure the connection is fitted with an isolating valve close to the cooktop.

If connecting the gas with a flexible hose:

- Ensure the hose is long enough to allow for removal of cooktop for servicing.
- Make sure the connector is located as shown in step 5 CLEARANCE DIMENSIONS.
- The hose assembly must be BS 699.1 certified, with an Rp 1/2" (ISO 7-1) female thread connection.
- The hose assembly must be no longer than 1.2 m in length with minimum internal diameter of 10 mm and comply with local codes and standards requirements.
- The hose must not be kinked, subjected to abrasion or permanently deformed.
- The hose must not be near or in contact with any hot surfaces (e.g. base of metal hotplate, flue, or chassis of underbench oven etc.)

14 CHECK ALL CONNECTIONS FOR GAS LEAKS

14 AFFIX DUPLICATE DATA LABEL SOMEWHERE ACCESSIBLE & PLUG COOKTOP IN

15 FIT PAN SUPPORTS

Ensure the pan supports are located securely and in the correct orientation (refer to User guide)

16 TEST OPERATION

- To check that the ignition system operates correctly, light each burner by itself, then all burners in combination.
- Check for a well-defined blue flame without any yellow tipping.
- If any abnormality is evident, check that the components of the burner assembly are located properly
- If proper operation cannot be obtained, contact Customer Care or your nearest F&P Authorized Service Center.
- The cooktop must not be used by the customer until proper operation has been achieved.

TO BE COMPLETED BY THE INSTALLER

- Have you installed the clamping brackets?
- Have you verified that the type of model (factory-set for NG or LP) matches the type of gas at the site of installation?
- Have you used the fibre washer supplied?
- Have you sealed all connections with gas tape?
- Have you leak-tested all connections?
- Is the cooktop set to the correct working pressure?
- Have you affixed the supplied duplicate data plate label on an adjacent surface accessible to the customer?
- Is the cooktop earthed?
- Check that the power supply cord is NOT touching the cooktop.

OPERATION:

- Do all burners ignite both individually and in combination?
- Are the flames consistent and appropriately sized?
- Have you demonstrated the basic operation to the customer?
